Radial Limits of Nonparametric Capillary Surfaces

Prof. Kirk Lancaster
Wichita State University

February 3, 2017
3:30 - 4:30pm
DERR 329

A survey of results on the behavior of
nonparametric prescribed mean curvature
surfaces in wedge domains will be presented.
Recent collaborations by Professor Lancaster and his
PhD students in understanding the behavior of the radial
limits of nonparametric prescribed mean curvature surfaces in
wedge domains will also be discussed.
